

## **Discover your New Life!**

### **Step 1: Discover and Highlight**

After (or as you are) reading the Bible Passages, look over them to discover what it might be saying to you. Your discovery may focus on these four areas.

#### **Remember**

What is memorable?  
Why is this important?

#### **Reveal**

What does this reveal about God or Jesus?  
Why does this reveal about people or life?

#### **Relate**

How might I relate to God or Jesus?  
How might I relate to other people?

#### **Real Life**

What might apply to my real life?  
How might I need to change?

Once you have highlighted different areas of discovery, share what you have discovered with your mentor. What have you found in the passage?

### **Step 2: Discuss with Mentor**

At the end of every set of Bible passages, there are four suggested questions to help you and your mentor dig deeper into the Bible passages. The first three questions (Q1-Q3) focus on the three sections you have just read.

### **Step 3: Apply discoveries to Your Life .**

Finally, consider the last question (QA) which asks you to apply what you have read to your own life. In the final line of the lesson, you will have a choice to respond to the challenge God's word by choosing to change or deciding not to change.

### **Step 4: Review and Take-away:**

Finally, you will want to consider the big picture of the passage. Either your classroom instructor will walk you through a powerpoint of what this passage teaches us, which you can compare with your personal discoveries. Or, they can facilitate a discussion following the Video presentation of the passage. Each lesson ends with your decision—will you choose to respond or not to God's Word?
